SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The author(s) in-text referencing of this manuscript is not consistent and should be reviewed thoroughly and follow the journal's recommended format of in-text referencing. For example, - For citing a text with a single author Greenwood, 2013 - For citing an article with two authors Greenwood and Adams, 2013 - For citing an article with more than two authors the phrase 'et al' should be in italics and should be followed by a full stop and a comma Greenwood et al., 2013 Author(s) should review entire manuscript to ensure the in text referencing is properly done. 2. The details of the study area in session 2.1 has been comprehensively spelt out however it is important to cite the references for which the author(s) obtained these details especially in the second paragraph. Information on background weather conditions of the study area obtained have not been referenced. It is essential to insert this. 3. Author(s) should ensure that the approval for access to existing data on meningitis and all other data was obtained and is well documented in the manuscript as part of following the standard procedures for using existing data.
