

SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_37349
Title of the Manuscript:	Microstructural Evolution of Aluminum-4043/Nickel-coated Silicon Carbide Composites Produced via Stir Casting
Type of the Article	Original research paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Journal: <i>Current Journal of Applied Science and Technology</i> Manuscript ID Ms_CJAST_37349 Title: Microstructural Evolution of Aluminum-4043/Nickel-coated Silicon Carbide Composites Produced via Stir Casting Summary: The authors have studied the microstructure of Aluminum-silicon carbide (Al/SiC) metal matrix composites have become a promising engineering material owing to its high strength to weight ratio. The analysis has been carried out using SEM/EDS analysis. I recommend the Acceptance to this manuscript in the present form.	(1) The authors would like to appreciate the time spent by the reviewer to read through the manuscript and for considering it worth of being published in its present form.
Minor REVISION comments		
Optional/General comments
