| <b>Compulsory</b> REVISION comments | <p>The review paper is good and relevant because addresses a topic of global importance.</p> <p>In general, a review paper is considered a detailed, selective and critical study that integrates the essential information of a topic. It also identifies the relevant aspects known, the unknown and the controversial aspects of the revised topic. In addition, it identifies the theoretical and methodological approaches on the subject, critically discusses contradictory conclusions from different studies and suggests aspects or research topics.</p> <p>I encourage the authors to emphasize in their paper those attributes a review paper and mainly to identify the theoretical and methodological approaches on the subject, critically discuss contradictory conclusions from different studies and suggest aspects or research topics.</p> <p>Also, I have some suggestions noted in the text (see pdf). For example, the objective or purpose of the review and its scope should be included in the abstract and introduction.</p> <p>As well, it is important that the authors improve the review with other scientific articles more current of the topic (e.g. 2015, 2016 and 2017).</p> <p>Available on line:</p> <p><a href="http://journals.plos.org/plosone/article?id=10.1371/journal.pone.0179535">http://journals.plos.org/plosone/article?id=10.1371/journal.pone.0179535</a><br/> <a href="https://www.uky.edu/~jast239/reprints/Geography%20Compass%202016.pdf">https://www.uky.edu/~jast239/reprints/Geography%20Compass%202016.pdf</a></p> <p>and they can look for others.</p> | <ol style="list-style-type: none"> <li>1. The major contradictory conclusions have been discussed in brief.</li> <li>2. All the corrections asked by the reviewer in the text through sticky notes, have been done accordingly. Only the modification of figures could not be corrected as these were taken from a specified source mentioned by specific references and not made by me. Hence, it has been kept as usual in black and white format.</li> <li>3. The manuscript has also been upgraded by incorporating some recent scientific findings from the years 2015 to 2017.</li> <li>4. Remaining all the necessary modifications has been done accordingly.</li> </ol> |
| <b>Minor</b> REVISION comments      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
