SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Introduction ● Author(s) should clarify why this manuscript focuses on the tribal adolescence, and what the difference of body image between adolescents in Western culture and the tribal adolescents is. ● Please more cite previous studies which focus on perception of physical appearance, self-concept, self-worth, etc. in the context of adolescent development. ● Please clarify what is the purpose of the present study. Materials and methods ● Please clarify participants' gender, mean age, the way of collecting data, and the details of the materials. ● Please describe the details of the body image perceptions schedule because Divja & Mayuri (2014) is an unpublished manuscript and readers can't access the original information. Results and discussion ● Aren't measures of perceptions of body image and satisfaction used as total scores? Why do authors use it for each item? ● How about the gender differences? How about the interaction of gender and age on the scores? ● Some scores show 1 (mean) and 0 (SD). I think all participants rate 1 for the items. Is it appropriate to use them for statistical analyses? ● Please discuss the meaning of the results that were obtained from Indian tribal adolescents, comparing with other countries (previous studies).	Yes, I had made changes as per the comments of the reviewer. Introduction: As per the comments I have given the purpose of the study, added more studies and discussed the differences among western and tribal adolescents. Materials and methods: more details have been added about the schedule in order to make a clear understanding and clarification regarding the gender, age and collecting the data was also added Results and discussions: in order to give a comprehensive understanding item wise discussion was given in the results. Another article had separately done on gender difference hence it was not described in the present article. Yes, regarding the scores 1 and 0 for not all the items had the same score hence, it was described clearly regarding the items among the group of participants which clears the results about the data not the participants. Studies were added describing the comparisons with other countries.
