

SDI Review Form 1.6

Journal Name:	Asian Food Science Journal
Manuscript Number:	Ms_AFSJ_42055
Title of the Manuscript:	Development of a set-up for creep test of biological / viscoelastic materials subjected to uniaxial compressive loading
Type of the Article	Original Research Article

Comment [S1]: Remove full stop

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

[SDI Review Form 1.6](#)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Citations should be numbered according to journal format. The guideline is here under: References must be listed at the end of the manuscript and numbered in the order that they appear in the text. Every reference referred in the text must also present in the reference list and vice versa. In the text, citations should be indicated by the reference number in brackets [3]. 2. References were not arranged according to journal format. The guideline for arranging references is here under: <u>For Published paper:</u> 1. Hilly M, Adams ML, Nelson SC. A study of digit fusion in the mouse embryo. Clin Exp Allergy. 2002;32(4):489-98. Note: List the first six authors followed by et al. Note: Use of DOI number for the full-text article is encouraged. (if available). Note: Authors are also encouraged to add other database's unique identifier (like PUBMED ID). 3. Remove full stop at the end of the title of the manuscript as it is not needed. 4. All the citations from 30 to 50 that were not mentioned in the text but arranged in the references were highlighted with blue in the reference section. Either you cite those references if necessary or remove if unnecessary. 5. Support your results with similar experiments (5-6) conducted by other researchers on compression load. It will strengthen your results and discussion part of the manuscript.	
Minor REVISION comments		
Optional/General comments	Improve discussion part of the manuscript. The manuscript possesses novelty.
