

SDI Review Form 1.6

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_37201
Title of the Manuscript:	ESTIMATING THE EFFECT OF LOADSHEDDING ON OUTAGE RATE IN A LOW VOLTAGE NETWORK
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	This paper estimate major effect of load shedding on the LV network outage rate. However, the summary of the paper does not clearly state the method of calculation, only the calculation results, this is not appropriate. The author should rewrite the abstract of the article, including the method and calculation tool.	
<u>Minor</u> REVISION comments	This paper is essentially a result of power quality statistics at distribution substations. Research results are not new, not special, scientific content is not good.	
<u>Optional/General</u> comments	The author does not comment on the results in Tables 1 to 6, and Figure 1, Figure 2. Solutions to overcome power outage, reliability improvements are not detailed. Therefore, this article is not extensible, not general
