

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_38532
Title of the Manuscript:	Changes in the activities of sugars and sugar metabolic enzymes in grape berries during development
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The four stages of berry ripening were renamed, but are still not enough specific. As I suggested previously, please use some standardized description of stages from some common system for identifying grapevine growth stages, like Eichorn and Lorenz (E&L) system, BBCH or Baggioolini. One example is given here: https://www.awri.com.au/wp-content/uploads/grapegrowth.pdf In the Materials and Methods use also the specific number when describing the stage of berry ripening, for example E&L 35 Berries begin to colour and enlarge. Please state clearly this into each figure: Value over the graphs is the interaction of pooled data and only maximum values are indicated.
