SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Generally, the title and abstract are clear, but the paragraph on the instrument used for field sampling must be moved to methodology section. - In introduction section, several statements need references. - The legend of Figure 1 is not readable. In this figure, add the country name in the title. - Figure 2, Tables 1, and 2: the used abbreviations must be self understandable. The majority of readers get a first impression of the relevance of a contribution only by studying the illustration, and without reading the paper sections to understand the meanings of the used abbreviations. - Table 3: where is the title? - Figure 4, Y Axis? - The authors must correct the punctuation, some unclear and long sentences. - Discussion very short and poorly written. This manuscript has not a scientific discussion section; the authors must discuss the results and compare with other new and relevant references. - Conclusion is very short too and not supported by the findings and references. For these reasons, I recommend some revision	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
