

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms CJAST 39762
Title of the Manuscript:	Development of Multiple Regression Model in Predicting the Dissolve Oxygen Deficit of Ntawagba River
Type of Article:	

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
English is poor. There are a lot of incomplete sentences and misspelling like Ph (should be pH), dissolved oxygen (dissolved oxygen) etc. STILL NOT CORRECTED. There are no table captions. TABLE 3 STILL HAS NOT CAPTION I did not understand table 3 represents which sampling point's results. All tables needs to be clarified. Figures needs to be proven in terms of English. In discussion section author stated that "However, there was a significant oxygen deficit at the point 4 and 5 in Fig. (4) For 190 dissolved-oxygen.". He/she did not explain why STILL NO EXPALANATION. The results need to be discussed in detail in discussion section. Each sampling point needs to be discussed in detail. STILL NO DISCUSSION TECHNICALLY POOR PAPER.
