

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_43786
Title of the Manuscript:	New materials for insulation in rural construction
New title:	New materials for thermal insulation in rural construction
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
This article presents a study on thermo-physical characterization of local materials used in building and simulation under EnergyPlus software. (Need reconstruction for the sentence. Was the author trying to say that the characterization was done under Energy Plus Software?) The studied materials are lateritic blocks simple and those stabilized with the nere pod, the cement and the lime. (Was it suppose to be sample?) Line 13 - thermophysical propreties. The materials LG14%, LG16%, LG12%, Clay88% G8% C4% and La92% lime4% G4% have thermal conductivities less than 0.5 W.m⁻¹.K⁻¹. (Abstract is written to provide a rough idea about the whole article and this sentence clearly doesn't convey the idea.) Line 22- The objectif Line 26- thermal conductivit Line 30 - alfa fibers (for the rest of the article capital letter was use for ALFA. Is it a acronym? Too many spelling errors. I'm tired of reading. Please send it for proof reading before resubmitting. Do use autocorrect if necessary.
