

Editor's Comment:

The manuscript can be considered for publication after the following correction.

Specific comments

- [1]. Rice husk ash should be briefly mentioned in the Introduction.
- [2]. All the equations should be prepared more professionally.
- [3]. Reference lists – all the journal names should be given according to the CFAST format.

General comments

Referring to the feedback from the authors to reviewer “You should have highlighted the areas with spelling mistakes and sentences that need reconstructed instead of asking us for a general review”. Editor's view: Reviewers' task is not merely to help the authors to check grammar and spelling. That is author main task. See the following examples (not related to grammar, but simple careless mistake – after 2 times revisions still detectable). Please revise it properly and give your feedback politely.

- [1]. Line 40: ?? M H₂SO₄?
- [2]. Line 58: ...105°Cfor six hours? Check spacing.
- [3]. Line 59: ... montmorillonite –silcanano? Check spacing.
- [4]. Line 67: Synthesis of Montmorillonite-silcananocmposite? Check spacing
- [5]. Line 163: ... Langmur represents? Check spelling.
- [6]. Line 229: ... plot of t/qt againt t? Check spelling.
- [7]. Line 254: ... Journal ofHazarous material? Correct the journal name.
- [8]. Line 255: ... wastecontaining? Check spacing.
- [9]. Line 259: ... AReview? Check spacing.
- [10]. Line 260: ... andShafiqu? Check spacing.
- [11]. Line 267: ... PartheniumhystrophorousWeed? Check spacing.
- [12]. Line 276: ... onmontmorillonite clay? Check spelling.
- [13]. Line 279: ... adsorbentdesalination? Check spacing.
- [14]. Line 293: ... Nanocompo-sites? Check spelling.
