PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|--|---|---|
| <u>Compulsory</u> REVISION comments | <p>In this work has been reported a study of bio sorbents by bottom up approach and their applications for the treatment of simulated dyes waste water. The contribution of the manuscript is certainly important for this area of research. <u>Decision</u>: The manuscript is suitable for publication after major revision. My concern is as follows:</p> <ol style="list-style-type: none"> 1) I suggest that the authors present a Table where could be compared their results with other of the literature. 2) Authors should review the English language. 3) Authors should reduce the number of figures to a reasonable amount, given that the article contains 52 figures. | <p>I have corrected all my mistakes. Kindly re-check my manuscript. I have deleted all the unnecessary figures. Thank you again.</p> |
| <u>Minor</u> REVISION comments | | |
| <u>Optional/General</u> comments | | |
