	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The aim of this research was to tested the influence of Tinospora cordifolia and Emblica officinalis dry extract upon some pharmacological parameters in clinical trial. This manuscript brings new information regarding to the therapeutically proprieties of these species.</p> <p>But the paper could require some corrections such as:</p> <ul style="list-style-type: none"> <li>- It must be improved English language; there are some misspellings in the text.</li> </ul> <p>The chemical characterization, standardization of the extracts should be made; no suitable quantitative determination methods are used.</p> <p>The trial should further be extended to larger sample size and for longer trial duration to draw more conclusive evidence.</p>	<p>Thank You sir for your comments</p> <p>As per your advice we have corrected the manuscript in order to improve the misspellings language and grammar.</p> <p>We have made the extract (ghana) which is a classical Ayurveda formulations mentioned in Sharangadhara Samhita (provided in reference).</p> <p>We have already suggested in conclusion part of manuscript regarding further validation of this finding.</p>
<b>Optional/General</b> comments
