<p>Although there are still some typos and the authors did not follow the recommendation to create graphs, the manuscript has been improved in quality. The English still deserves some improvement. I still recommend the authors to include some graphs rather than only tables.</p> <p>Main concerns:</p> <ol style="list-style-type: none"> 1- Line three of the abstract, please verify and correct the word viw into view? 2- Line 77, "Knowledge of medicinal uses of the plants are" please change the verb to is; 3- Line 162, It cantains should be it contains... 4- Line 174, Boost correct to boosts; 5- Page 176, cause rather than causes; 6- Line 203 of discussion, the word allged should be alleged?! <p>And so on.</p>
