

## SOME MINOR ADJUSTMENTS

NOTES: the comments in Red are corrections to the ones in Black

10. Should read: **Traditional medicinal plants are used to treat human ailments through out the world.**

11. primary health care need practiced typically liver problems by indigenous practitioners. There is no cohesion between this statement and the prior sentence. This looks like a floating statement. It should be re-casted or removed completely.

11. This research review was employed with objective of

12. ethnobotanical study on the medicinal plants emphasize on the compiled and documentation of indigenous

13. knowledge associated with the treatment of liver problems by these plants reported from different ethnic group of

14. Ethiopia.

**The above statements could be re-casted thus:**

**This review was employed with the objective of compiling and documenting ethnobotanical studies on the use of medicinal plants, associated with the treatment of liver problems from different ethnic groups in Ethiopia.**

22. The medicinal plant preparations were administered through oral

Should be adjusted thus: **The medicinal plant preparations were administered via oral gavage or Oral route of administration was employed for the medicinal plant preparations**

36. In Ethiopia, most of the human population **is** dependent on traditional medicine plants

38. Most studies included surveys of utilization of medicinal plants for the treatment **of** different diseases in different parts

39. Among the various types of plants identified

40. those claimed to be used for liver problem/disease treatment. **This statement is a floating statement and bears no meaning therefore it should be expunged.**

43. liver disease(s) caused by a variety of factors and affecting everyone from infants to older adults worldwide

48. are used in traditional medicine for their liver disorder effects.??? Are they used because they cause liver disorders or because of their supposedly ameliorative effect? The statement can be re-casted to: are used in traditional medicine for their effects on liver disorders.

50. Although the diagnosis of the major liver problems can be made by herbalists or practitioners (what practitioners??) with history taking,

51. physical examination of the patient which was the baseline for modern laboratory examinations for treatment in

This statement is also another floating statement. It could be re-written thus: The diagnosis of major liver problems can be made by herbalists or medical practitioners from prior medical history of patient and physical examination and laboratory tests among other.

54. treating different ailments, typically liver cases and its related disorder(s)

56. and documentation of people indigenous knowledge. People there should be expunged or written thus people's

60. ethnobotanical study on the medicinal plants with emphasis on the compilation

62. from different ethnic group(s) in Ethiopia.

64. The present review(ed) literature(s)

65. Relevant information were searched and analyzed??? Why not use the term studied instead of analyzed??

66. traditional medicinal plants pertaining to the treat(ment) liver problems in humans

67. liver disease(s)

68. groups from the past to this present time.

68. These profoundly help

69. indigenous practice aiding in medicinal plant selection for treatment of liver problems

70. along the ethnicity based on the availability of plants in the districts or locality.

Continue from

123. Figure 1: MPs this should be written in full under the chart used and the symbol (%) should also be included on the vertical axis

164. This could be due to the fact that naturally there are more herbs

165. than woody plants species are overused because of their diverse use value for human beings. This sentence should be re-casted: This could be due to the fact that naturally there are more herbs than woody plants species. Herbs are overused because of their diverse value for humans.

168. Therefore, the trend of using more of herbaceous plants could be 168

169. advantageous as it is easier to cultivate them when they are in short supply and even naturally grown in natural

170. nvironment or simply they are annual. This statement should be re-written. The conclusion isn't clear. "or simply they are annual".

172: the percentage symbol (%) should be included on the vertical axis of figure two and MPs written in full.

178. This review is in agreement with the work of (2, 6, 35) 178

179. that (which) reported roots as one of the most extensively used part of the plant in remedy preparations used for treatment of multiple diseases in Ethiopia(.)

180 However it disagrees with the reports of (1, 4, 5) that (which) reported (the) leaf as mostly preferred for remedy 180

181. preparation (s). The report also shows the flower parts as been highly utilized for treatment of jaundice and Hepatitis among India (n) people (54). 181

183 Also the percentage symbol should be added after the word percentage on the horizontal axis in this figure 4.

189. chance of preservation i.e. not stored for later use. However, during this review local healers were ("were" should be expunged please) argued that fresh

192 Wherein, medicinal plant "wherein" should be expunged also.

198 One herbal preparation was taken by mixing with different ingredients recommended antidotes includes drinking

199. milk, eating honey, bread of black tef and occasionally slow down of drinking water accordingly

The statement above needs to be restructured please. Both syntax and semantics are out of place.

203. the symbol of percentage (%) and (F) can be added in front of the individual words in the table. The data and the headings can also be centralized for both frequency and percentage using CNTR+E function. This could bring out the beauty of the table.

211. percentages are mostly represented using pie charts. However, it is imperative to still indicate the symbol (%) on the figures. Because even the title used for the chart has no information to disclose that its showing percentages and not frequencies.

221. Although the diagnosis of the major liver problems can be made by herbalists or practitioners with history

222. taking, physical examination of the patient which was the baseline for modern laboratory examinations for treatment

223. in modern technology. But the diagnosis for the problem still inadequate

Please refer to prior correction of these sentences above.

239 medicinal plants used for treating (treatment) of liver problems

241. part(s) of medicinal plants for treating liver cases was (were) root and leaf.

241. Major medicinal plants that (were) cited by different

243. review indicates that liver problem is common in Ethiopia and hence it has to be further means of treatment by

244. investigating the phytochemical extraction, screening for clinical test in modern approach

the above sentence could read: review indicates the prevalence of liver problems in Ethiopia which necessitates further investigations of herbs used in light of modern, clinical and scientific research approach.
