SDI Review Form 1.6

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_45717
Title of the Manuscript:	Polyphenol content and antioxidant activity of bark hydroethanolic extract of Piliostigma reticulatum (DC) Hochst and its fractions
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that <u>NO</u> manuscript should be rejected only on the basis of '<u>lack of Novelty'</u>, provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		, , , , , , , , , , , , , , , , , , ,
	1. English is very poor in the whole manuscript; it need to be rewrite again.	
	2. Introduction part should contain detail information related to your research but you have given only few previous studies of your plants which indicates lack of total information regarding this studies. Please have a look on references, which will help you how to elaborate introduction or background.	
	3. How did you choose this dose? As we know that there is chance toxicity in crude extract as it contains many compounds some are more or less toxic, to make sure you should have to perform toxicity test.	
	3. There are so many problems with symbol such, mn, ABTS+•, what does it indicate?	
	4. Results need to be rewrite again by following the previous studies	
	5. Discussion should contain detail evidences related to polyphenol, Antioxidan	t
	activity and Ferric Reducing Antioxidant Power assay.	
	6. Mechanism of action is not cleared in the discussion.	
	7. Please have look on below references which will help you to rewrite or correct	t
	your paper.	
	References: -	
	a. Investigation of Antioxidant and Cytotoxic Activities of Methanolic Extract from	1
	Curculigo recurvata Leaves	
	b. Ex-vivo cytotoxic, antibacterial and DPPH free radical scavenging assay with	n e
	ethanolic leaf extract of Glycosmis pentaphylla to justify its traditional use	
	c. Evaluation of Thrombolytic and Cytotoxic activities of an Ornamental medicina	1
	plant: Byttneria pilosa	
	d. Anti-Inflammatory and Anti-Oxidant Study of Ethanolic Extract of Mimos	a
	pudica	
	e. Potential investigation of anti-inflammatory and anti-oxidative property of	f
	ethanolic extract of Ixora nigricans leaves	
	f. Evaluation of antimicrobial and cytotoxic activity of Lentinus edodes (Shiitak	e

	Mushroom) cultivated in Bangladesh g. In vitro Investigation of Antimicrobial, Antitumor and DPPH Reduction Capacity of the Methanolic Extract of Scoparia dulcis h. Ealuation of cytotoxic and ex-vivo cardioprotective investigation of ethanolic extract of glycosmis pentaphylla leaves	
Minor REVISION comments	 Plant materials and Extraction is not clear; it should be scientific. Why did not you use random dose instead of 250 - 125 - 62.5 - 31.25 - 15.62 - 7.81, suppose dose 7.81 μg / ml is effective compare to other, then how will you prepare if you need to prepare only one dose??? Figure 1: Y-axis should contain number to present in mg. Same word has been used many times, too poor. 	
Optional/General comments	I would suggest you change the figure formats if you have raw data please present your results in the table	

PART 2:

		Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details) It is not animal studies, so I do not think, Ethical approval is important for this paper but Plant herbarium number is required.
