

Editor's Comment:

Thanks for your mails on the above matter.

I have gone through all the stages for evaluating the manuscript under review and my comments are as follows:

1. The 3 reviewers- Petry; Telarotti Jr, ; Papazifirupoulou and Valtuille have made scientifically sound comments on the manuscript and I do agree with their comments.

2. None of the reviewers rejected the manuscript after the final corrections were done by the authors of the manuscript;

3 As the authors have complied with the instructions of the reviewers,

I hereby recommend that the manuscript" Determination of the effect of gum arabic on body weight and some biochemical parameters on albino Wistar rats" be accepted for publication in our Journal.
