SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1) The formatting of "Introduction" chapter is wrong (only capital letters). Please correct it. 2) Line 85: please provide full name of used HPLC column along with its dimensions (an example: Sunifre C18, 3.5 μm, 4.6x150 mm) 3) In a few places unit "mcg" appeared. Is it microgram? If so, please use "μg".	1) Corrected 2) Corrected as suggested (ODS Hypersil 5 μm, 2.1x50mm) 3) Corrected
<u>Minor</u> REVISION comments	1) Line 78: The temperature of serum storage is -220 °C. Is this correct value or misspelling? (I think that -20 °C is a standard temperature for such a task) 2) Line 97: In my opinion the dilution ration should rather be expressed as 1:50.	1) It is misspelling and corrected accordingly 2) Corrected
<u>Optional/General</u> comments	I evaluate the manuscript as well written, properly presenting the obtained results; a few abovementioned remarks does not diminish its value. If you gathered some more data (like Apgar scores of children) you can add it to further improve the quality of the work.	Comment welcoming. Apgar data was not obtained and suggestion will be duly considered in future studies
