

SDI Review Form 1.6

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_36022
Title of the Manuscript:	Effect of Gum Arabic as Prebiotics and lactobacillus casei shirota (LcS) as probiotic on Oxidative Stress and Renal function in Adenine-Induced Chronic Renal Failure in Rats
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	AA analyzed the effects of AG&LcS on renal function with or without adenosine administration to induce renal damage in Wistar rats. Main comments: -The study was well designed with the exception of the lack of laboratory data (urea, creatinine, K,etc) on week 0. Absence of histology of kidney tissues are also remarkable. - Bar graphs or the addition of a new column with the statistical significance level are necessary to better display the <u>results</u>. -Discussion&conclusions were confusely displayed.E,g AA did not explain the basis of anti-inflammatory effect of AG&LcS.Which were the inflammation markers analyzed in the study? -Paragraph of line 138&line 231 showed controversial opinion of AA about the anti-inflammatory effect of GA&LcS.	- I replaced table 2 with bar graphs. - No inflammation markers were analysed, so this part has been deleted. - The anti-inflammatory effect of GA&LcS has been deleted. -
Minor REVISION comments		
Optional/General comments
