

SDI Review Form 1.6

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_39438
Title of the Manuscript:	Effects of higher doses of vitamin E on toxicity and inflammation.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Could the authors please explain in discussion why there was a discrepancy in the results of plasma and organs? Namely, 200mg Vit E treatment up-regulated TNF- α and IL-6 in liver/kidney/brain, but not in plasma?	In the discussion, we add some text (in yellow) in which we try to explain this discrepancy, but we are not sure whether this is the real reason for this.
<u>Minor</u> REVISION comments	It would be a stronger story, if adding some pathological studies to the results that cover the inflammatory infiltrations in the tissues of these organs.	We agree with the reviewer that information on pathology, this paper would be stronger, but unfortunately we have no data on tissue pathology and for us it is not possible to perform additional measurements.
<u>Optional/General</u> comments
