**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/30/editorial-policy>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	In my opinion is not clear the objectives and aims of the present paper. .For instances, if it is the result of the research project, fail in the description of materials and methods and methodologies used in the determination of Moringa oleifera health effects. Of course lack a description of the results and a final discussion. On the other hand, if the paper is only a bibliographic recopilation to gain first hand information about the of Moringa oleifera pharmacological and nutritional properties, then, the paper not need a Materials and methods section, because is only a recopilation. Please, notify to the authors about the real purpose and objectives of the paper, because is not clear for me.	Thanks for your valuable suggestions. This is a review paper and as suggested we have removed materials and methods section. Whole paper is re arranged in the format of review paper of this journal.
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
