PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	More details for molecular identification of lactic acid bacteria isolates is required for easy reproducibility.	Authors are of the opinion that the information given is ok.
Minor REVISION comments	Please check few areas in the manuscript highlight.	The highlighted areas have been corrected and shown in green colour
Optional/General comments	The entire manuscript is very informative and well written. The authors have made an impressive attempt to discourage food industries from solely depending on chemical preservatives. I recommend that this article should be published after considering minor corrections. Authors should check authors' guide in respect to referencing style.	Authors are very grateful for this information The references have been corrected according to the author's guide
