SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	There are two types of objections are need to be modify- Firstly, a special section of EJNFS is dediacted to publication of extended abstracts of "grey literature government reports", while the manuscript counts 17 pages, so it is too long. Secondly, the manuscript is important, even very important for public health in Nigeria. It is based on the known effects of healthy lifestyles and lipids, including saturated and polyunsaturated fatty acids and micro-nutrients on the cardiovascular system. Traditional lipids as major cardiovascular risk factors were analysed, but not apoB lioproteins (LDL- and non-HDL cholesterol). HDL not always have antithrombotic action Recommendations have great practical value but not scientific.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
