SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	The review focus on an interesting topic: "nutritional knowledge and its relation with dietary behaviour". I find this review quite useful, and I am quite sure the readers will find tools and strategies very useful to face the problems on human health and nutrition. However, the authors should consider that as there are no magic solutions, recommend that it is possible to get significant work on by taking into consideration the entire problem and the environment where it is involved, based on scientific work, which it is really important that. In fact, it should be interesting that the authors discuss more on that scientific work done so far, including some Tables and/or Figures, making it more illustrative and attractive to the readers.	
<u>Optional/General</u> comments
