

SDI Review Form 1.6

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_34857
Title of the Manuscript:	Extraction and concentration of Cola nitida compounds using membrane processes : analysis of operating parameters and membrane fouling
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The manuscript addressed the continuous treatment of Cola extracted with MF, UF, and NF. The transmembrane pressure and flow rate of tangential flow was changed to determine the performance of total membrane system. However, the article was long to read hard. if possible more shorter by focusing the topic or deleting some discussion by citing the references are better for the reader.	
<u>Minor</u> REVISION comments	Some points have to be checked. 1) line 54, judge should be changed to know. 2) Figure3, x axis should be from zero, and caption of flux 50 is known . was cut-off ability of membrane? 3) Once again, please check the references. abbreviation of journal is included. Please unify the instruction how to write the name of journal.	
<u>Optional/General</u> comments
