PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript presents data referring the parameters of considerable relevance for about lipid profile and glucose uptake. But the use of only 4 rats per group it worries me, because this number of animal it seems to me lot reduced to roll a ANOVA one way.</p> <p>I would like to see the sample calculation, ok?</p> <p>Are there ethical issues in this manuscript? I missed a protocol ethical committee of approval for use of animal.</p>	
Minor REVISION comments		
Optional/General comments
