

SDI Review Form 1.6

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_39827
Title of the Manuscript:	Detection of Oxytetracycline Residues in Table Eggs in Khartoum State
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/journal/30/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Although the indications to be fixed are highlighted in the manuscript, I consider it important to note that the authors in the Introduction use the term "natural gastrointestinal flora". Although in Medicine "flora" term is widely used, it is incorrect. The correct thing is to say " microbiota " that means microorganisms that are located in a normal way in different places of the bodies of the pluricellular living beings, such as the human body. The term "flora" comes from plants and means set of plants that populate a region. As microorganisms are not plants, since some years the term human "microbiota" has been used as the correct term, so, natural gastrointestinal microbiota is the correct form. Therefore this must be fixed.	
Minor REVISION comments		
Optional/General comments	The manuscript refers to a simple investigation, but executed with scientific rigor and with updated bibliography. It addresses an issue of scientific interest and high social impact. The wording in English should be revised. The manuscript requires Minor Revision .
