

SDI Review Form 1.6

Journal Name:	International STD Research & Reviews
Manuscript Number:	2013_I-SRR_8709
Title of the Manuscript:	Anti-proliferative Effect of Lime Juice on the Ovarian Cortex of Adult Wistar Rats (Rattus Novergicus)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>Author/s intended to investigate anti-proliferative effect of lime juice on ovarian proliferation. This study is indeed interesting however it is lack of substance. If the authors wanted to prove that lime-juice has an anti-proliferative effect on ovarian proliferation, immunohistological study/protein expression study by for example Western blotting is needed to look for the level of expression of proliferative ovarian marker ex Ki-67. Histology alone is insufficient.</p> <p>Author should also measure plasma estrogen and progesterone level as they are important to exert a negative feedback effect on the pituitary, thus could affect LH and FSH level</p> <p>Introduction- need improvement. Author should discuss related to the topics. It's too wide</p> <p>M&M; testis is mentioned!</p>	<p>The authors actually worked within the limit of the resources available and discussed within this limit in support of the relevant work that has been done recently.</p> <p>Other necessary corrections have been adequately observes and done.</p>
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
