Subject: Re: Request for editorial decision for manuscript number 2013/I-SRR/8709

I have seen that manuscript has gone several revisions and yet the manuscript continues to carry many mistakes that it cannot be cleared. The reviews have certainly helped the authors to improve the quality of the manuscript but I find still the areas where it should be improved.

It is recommended that the authors incorporate the suggested modifications which I am attaching with the email. Therefore author(s) should be asked for review. I hope that after incorporation of suggested changes, the manuscript would have improved.
