SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	Key word should be arrange alphabetically You just describe the section E, what about other section Rewrite the reference in a uniform manner. In result portion of abstract, The age range of respondents is 10-19 years. In the table, the finding of results was > 20 age above 5.1%. Ethical Issues: About ethical consideration: Assent consent should be taken from guardians. Your study population was 10-19 years. So, Assent consent is needed.	Key words have been arranged alphabetically Sorry please, this has been deleted. Other sections were described without mentioning them. The reference section has been re-written in a uniform manner (Vancouver style) The most frequently occurring age group (15-19 years) was mentioned in the result section. All the age groups are shown on the table. This was actually obtained before the study and it has been stated in the body of manuscript.
<u>Minor</u> REVISION comments	In some sentences, there is Capital letter. Make the uniformity. What types of self-medication was used by adolescent girls. If you have finding describe precisely Rewrite the reference no 15 In 168: what is the means of tandem What is lucky dip means	Mix of capital and small letters have been rectified. Table 4 (2nd part) enumerates the types of self-medication often engaged in by the respondents. Reference number 15 has been re-written. 'Tandem' means in 'agreement' with. The former has been replaced with the later.

SDI Review Form 1.6

<u>Optional/General</u> comments	Better rewrite the finding parts. Instead of Table 1 shows that, better to write the study reveals that In figure, better to show the finding from ascending to descending or descending to ascending.	This has been re-written in line with your recommendations. This has been re-arranged in the figure
