**PART 2:**

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The manuscript is much improved and clearer. The authors have adequately addressed a majority of the consent I raised. The manuscript could be considered for publication after addressing the following consent;</p> <p>Check figure 1 again. It says 62.4% respondents did not have deceased parents, and this is contrary to line 159 which states that 62.4% of the respondents had deceased parent.</p> <p>I had earlier suggest figures 1, 2, 3, 4, and 5 be deleted and the data incorporated into the tables. Since the authors insist on using them, they should be cited properly in the text.</p>	<p>62.4% respondents had deceased parents has been corrected to ----- 62.4% respondents did not have deceased parents.</p> <p>We like to retain these figures because they are important variables to this study. However, we have cited the figures appropriately in the text.</p>
