SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>It is very critical to re-organize the study results as proposed:</p> <ol style="list-style-type: none"> 1. Perceptions of PMTCT programme <ol style="list-style-type: none"> a. Self-perception as HIV positive women with respect to the mode of enrolment into PMTCT b. Perception of HIV positive women about PMTCT programme <ol style="list-style-type: none"> i. Positive perception ii. Negative perception iii. Perceived barriers for PMTCT programme 2. Experiences of HIV positive women throughout the programme <ol style="list-style-type: none"> a. Experience on HIV testing & disclosure b. Experience on compliance with PMTCT recommendations/Interventions <ol style="list-style-type: none"> i.e. ARV uptake, institutional delivery, baby feeding c. Experience in the continuum of PMTCT services (trajectory) d. Lessons learnt of being PMTCT users (PMTCT literacy) <p>Discussion of the study to be improved. Major findings to be interpreted and discussed within the context of prior studies</p>	
Minor REVISION comments	<p>The key words need to be standardized throughout the article "perceptions and experiences" or "perception and experience"</p> <p>L7 to be re-written after reviewing the result component and to add in the conclusion, the implications of the study, just one sentence.</p> <p>L14&L16 reference 2 to be removed does not match with the idea developed in the book referred</p> <p>L19-20 name the country (Nigeria)</p> <p>L22-35 to be reorganized. The problem statement not clear. It is critical to</p>	

SDI Review Form 1.6

	<p>describe the performance of the PMTCT programme in the Nigeria with respect to HIV counselling and testing, ART uptake, institutional delivery, baby feeding and EID before to evoke different reasons of weaknesses of the PMTCT programme. Discuss other studies done to show the gap on perceptions and experiences of PMTCT users then formulate the article's objective.</p> <p>L42-43 the study might be descriptive and cross-sectional but it is a qualitative study and needs to respect most qualitative study criteria:</p> <ul style="list-style-type: none"> • Section Method instead of material and methods • Procedures and participants as sub-section instead of sampling methodology and method of data collection • Data analysis <p>The sample size needs to be justified</p> <p>L50, 51, 52 to be reviewed. There is discrepancy between the definition of comprehensive services of PMTCT provided in L40-42 and L50-51 which has additional criteria of support group or paediatric HIV clinic. It is a bias. The support groups or paediatric HIV clinic might be the entry point for data collection.</p>	
<u>Optional/General</u> comments	The study has a rich information to be organized and is publishable after in depth review
