

Editorial Comments:

Following are my observations regarding the review article entitled 'Epidemiology of Hepatitis B Virus Infection in South-South, Nigeria: A Review'

1. Correction of minor typographic mistakes **still** exist, e.g. *et al.* is **still** misspelled as *et al* at some places.
2. Sources of figures are **not yet given** and permission regarding copyright is **not yet** mentioned below the figures.

Authors Feedback:

1. All the *et al.* have been corrected and other corrections made as well.
2. About the permission to use the diagrams (figure 1 to 3) that we have other than our maps, kindly go through the next few lines below.
3. About figure one, we have replaced it with a similar diagram that does not require copyright permission. This can be verified at <https://www.intechopen.com/books/bioinformatics-updated-features-and-applications/the-study-of-hepatitis-b-virus-using-bioinformatics> (reference number 28).
4. Figure 2: Spherical, filamentous and an HBV Dane HBsAg particle (reference number 19) is without restriction and its usage is fine by the authors. This information can be confirmed at <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC3729363/>.
5. Figure 3 A: Organization of HBV genome and key regulatory elements, 3B. Transcripts and their related proteins of HBV [reference 29] does not have an email we can write to but they do have a copyright statement attached to it. We are not so clear about the statement and we have thus attached the link here for your kind advice. <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2809016/#!po=7.74648>.
