PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>methodology</p> <ul style="list-style-type: none"> - I think details of the sample size calculation are needed; set variables, mathematical demonstrations, etc. <p>Results</p> <ul style="list-style-type: none"> - Result comments should always precede tables or figures and not the reverse. <p>References</p> <ul style="list-style-type: none"> - An appropriate guide should be consulted to harmonize the list. Authors should start by slashing off the months in some references 	
Minor REVISION comments	Authors demonstrate a good mastery of language; but, better still to carry out a final thorough check, with much focus on a few typographic errors.	
Optional/General comments	Work is so appealing, and should be considered upon revision.	

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
