

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |                                                                                                                                                  |
|--------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Blood Research &amp; Reviews</a>                                                                                       |
| Manuscript Number:       | Ms_IBRR_31861                                                                                                                                    |
| Title of the Manuscript: | <b>INTESTINAL PARASITOSIS, HAEMOGLOBIN AND EOSINOPHIL LEVELS OF PATIENTS ATTENDING UNIVERSITY OF CALABAR TEACHING HOSPITAL, CALABAR, NIGERIA</b> |
| Type of Article:         | Original Research Article                                                                                                                        |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Authors' response to final evaluator's comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>There are some changes that have been included in the main text (with track changes). Also comments have been added. Hence:</p> <ol style="list-style-type: none"> <li>1. <b><u>Abstract</u></b>: few changes (please refer to the main document).</li> <li>2. <b><u>Introduction</u></b>: considerable improvement as far as citation is concerned. Yet some phrases have not been cited, please do so. The last paragraph in introduction has some contradicting sentences, please rectify</li> <li>3. <b><u>Material and method</u></b>: I am pleased with the efforts done by authors to rectify it.</li> <li>4. <b><u>Results</u></b>: this still has issues. Author(s) have constantly repeated to describe the information that is in the table into text, and this is waste of time and space. This requires correction. Either remove the table or summarise the information in to texts in a very simple manner.</li> <li>5. <b><u>Discussion</u></b>: Satisfactory. Few changes done in the main text. As an extra minor point, it would have been good if the authors had described in one or two sentences the significance of the study.</li> <li>6. <b><u>Conclusion</u></b>: Satisfactory. Few changes done in the main text</li> <li>7. <b><u>References</u></b>: they are not uniform. Please check the journal guidelines to author on how to write the references.</li> <li>8. <b><u>Others</u></b>: goods use of grammar.</li> </ol> | <ol style="list-style-type: none"> <li>1. The changes in the abstract have been effected.</li> <li>2. The omitted references have been cited. The contradicting sentences in the last paragraph in introduction have been rectified.</li> <li>3. Thank you.</li> <li>4. Results have been corrected. Tables' information summarise into texts in a very simple manner.</li> <li>5. Significance of the study has been described as suggested by the final evaluator.</li> <li>6. Thank you.</li> <li>7. References corrected.</li> <li>8. Thank you.</li> </ol> |
