PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I am attaching the concerns and edits of the first sections (before the discussion) which will clearly indicate the paper's status. I would caution the authors to actually consider and apply what the reviewer has advised. Simply adding more references and not making them more current, and not editing the paper as a whole are actually not respectful to the time and effort that go into a review. I am providing an attachment with the beginnings of the 1st round of edits. This paper is not at a stage of readiness for publication – it needs significant re-edits, reformatting, re-consideration of the literature, and reorganization in order to be ready for an international journal.
