

## SDI FINAL EVALUATION FORM 1.1

### PART 1:

|                          |                                                                                                                                       |
|--------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| Journal Name:            | <a href="#">International Journal of Biochemistry Research &amp; Review</a>                                                           |
| Manuscript Number:       | Ms_IJBCRR_20709                                                                                                                       |
| Title of the Manuscript: | Effect of Carboplatin and Methotrexate on Lipid Levels in the Plasma Membrane of MCF-7 Cells and their Association with Cell Motility |
| Type of the Article      | Original Research Article                                                                                                             |

### PART 2:

| FINAL EVALUATOR'S comments on revised paper (if any)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Authors' response to final evaluator's comments                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ol style="list-style-type: none"> <li>1. Please check and correct carefully the language used in the new version of the Abstract. The Reviewer can find many grammatical errors.</li> <li>2. line 6 and 34, antitumor/antitumour- please use uniform nomenclature in the text</li> <li>3. line 54 (...)generation platinum analog of cisplatin (Figure 1)</li> <li>4. The Reviewer would like to see Author's comment 6 from previous evaluation form (Compulsory) placed into the text of the article. It is important methodological info.</li> <li>5. If in the experiment medium with FBS was used, would be good to show those results</li> </ol> | <p>Dear Reviewer: Thank you again for taking the time to re-check my revisions.</p> <p>Abstract re-checked. All words with tumor in are rechecked and uniformly written. We removed the word second generation, even though the term describes carboplatin as being a second-generation drug.</p> <p>Concerning the drug concentration, a range of concentration was tried in preliminary studies.</p> <p>We re-stated in methods and in results that we have done experiments in presence of FBS and no cytotoxic effect was seen.</p> |
