

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBcRR_21483
Title of the Manuscript:	EFFECT OF COOKING METHODS ON PROXIMATE AND MINERAL COMPOSITION OF FLUTED PUMPKIN (TelfairiaOccidentalis)LEAVES
Type of the Article	Research paper

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (<i>if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here</i>)
<u>Compulsory</u> REVISION comments	The manuscript titled "EFFECT OF COOKING METHODS ON PROXIMATE AND MINERAL COMPOSITION OF FLUTED PUMPKIN (<i>TelfairiaOccidentalis</i>)LEAVES" is poorly written and english form needs to be fully revised before being considered for publication. Typos starts from the title (e.g. <i>Telfairiaoccidentalis</i> " instead of " <i>Telfairia occidentalis</i> " two words). Reported data in the introduction are not properly referenced and information should be added to justify claims (see use in traditional medicine). The experimental section should be better assessed. Carbohydrate analysis should be described and data obtained by a chemical analysis. Tables 1 and 2 must be justified: why protein content is increased by cooking for example? What does the minus sign means in table 2, etc. Obtained results must be justified since they indicate a variation in the content of nutrients and minerals (including soluble ones) due to cooking. The Conclusion section reports a well known consideration about cooking methods in favour of steam and microwave cooking: no relevant information is added to the area of interest.	
<u>Minor</u> REVISION comments	n/a	
<u>Optional/General</u> comments	n/a
