

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBcRR_21483
Title of the Manuscript:	EFFECT OF COOKING METHODS ON PROXIMATE AND MINERAL COMPOSITION OF FLUTED PUMPKIN (TelfairiaOccidentalis)LEAVES
Type of the Article	Original Research

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The effect of different cooking methods such as boiling, steaming and microwaving on composition of Telfairia occidentalis (Fluted pumpkin) leaves were investigated. The analyses showed that these cooking methods affect significantly the macro and micronutrients composition. The study is relevant and was well conducted. Some information is repeated such as related to relevance to cooking foods to avoid microorganism's infection. I suggest that author's synthesize these information. The authors reported that statistical analysis was performed using Anova followed Duncan post hoc test. However, in the figures the authors present percentage values of main nutrients evaluated. Please provide standard deviation or standard error of each column since these values were obtained from more than one sample of cooking.	
<u>Minor</u> REVISION comments	The English text needs to be reviewed Introduction section is too much longer.	
<u>Optional/General</u> comments
