SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Just a question, please justify your answer: You measure “ total lipids” , please mention from the biochemical point of view, its composition and what is its importance over details of measurements of total cholesterol, LDL and HDL with triglycerides. As now we do lipid profile of the above markers?????????? Total lipids will not be too much helpful in identification of hypolipidemic activity as I can't differentiate its component-→ this is my main remark on your work Ethical issue: Yes please, the authors have to mention their source of EC approval , date and number please in your methodology	

SDI Review Form 1.6

<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	Aim of the work , introduction, mat& methods, results , discussion and references are well-written and explained with up to date references.
