

Editorial Comments:

I will recommend that the authors of manuscript number 2014_IJBcRR_12893 have to do the following in order for the manuscript to be accepted for publication:

(1) Update the reference section with all 4 references suggested by the Anonymous Reviewer. Although, the authors claimed to have added the references, I could not find the 4 references suggested by the Anonymous Reviewer in the reference section.

(2) In the reference section, the authors did not appropriately space the names and initials of the authors of reference articles. For example,

LinL,Dong Y,Zhao H. Comparative evaluation of rosmarinic acid, methyl rosmarinate and pedalitin isolated from *Rabdosiaserra*(Maxim.) HARA as inhibitors of tyrosinase and α -glucosidase. Food Chemistry, 2011;129(3):884–889.

Should be presented as follows:

Lin L, Dong Y, Zhao H. Comparative evaluation of rosmarinic acid, methyl rosmarinate and pedalitin isolated from *Rabdosiaserra*(Maxim.) HARA as inhibitors of tyrosinase and α -glucosidase. Food Chemistry, 2011;129(3):884–889.

This type of correction and appropriate presentation should be effected for all the references in the reference section.

(3) The authors should check to make sure that period or full stop is added at the end of all Figure titles. I noticed that some of the Titles to the Figures have period and one does not have period added.

(4) In the body of the manuscript text, the authors use (Figure 1) and (figure 2). There should be consistency in the usage. I suggested the authors use capital F for consistency through out the manuscript - that is, (Figure 1), (Figure 2), etc.

In addition, Figure titles should be presented as follows:

Figure 1. Effects of different doses of **ethanolic** extract on postprandial blood sugar after sucrose ingestion.

And not as:

Fig. 1. Effects of different doses of **ethanolic** extract on postprandial blood sugar after sucrose ingestion.

(5) The authors should check and make sure period or full stop is added to the end of each numbered list on pages 3 and 4 of the revised manuscript.

Hopefully, implementation of the above recommendations by the authors will further improve the quality and presentation of the content of the manuscript.

Author's feedback:

The manuscript has been updated with the four references
The spacing in all the references have been corrected
Figure was used to replace "Fig." as recommended
full stop was used in the respective areas
