

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_23216
Title of the Manuscript:	Optimizing the aggregation propensity of therapeutic monoclonal antibodies against cancer and autoimmune diseases: a computational study
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. All the changes made in the revised version should have been highlighted for easy review. 2. The description of “L1, light loop 1; L2, light loop 2; L3, light loop 3; H1, heavy loop 1; H2, heavy loop 2; H3, heavy loop 3” on page 1 is not appropriate. “Loop” should be corrected with “CDR”. 3. There are still lots of errors including grammatical, editorial, and formatting errors. Here are just three examples: A. In the abstract, “the” should be added before “amino acids” in the sentence “...by specific ‘mutations’ of amino acids with exposed side chains”. B. On page 4, the sentence “...based on an amino acids substitution approach” should read “...based on an amino acid substitution approach”. C. The CDR abbreviation was spelled out twice on pages 3 and 7.	We thank the reviewer again for his accurate points raised 1. All amendments made are highlighted in yellow 2. The “Loops” were changed with CDRs 3. A) It was done B) It was corrected C) It was corrected
