

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_23807
Title of the Manuscript:	Assessment Antiobesity and Anti- fatty Liver Effects of leaf Extract of Cynara scolymus L. in Mice under Diet-Induced Obesity
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Abstract – conclusion- Authors claimed the mice were obese. Is 4 weeks feeding on high fat diet enough to cause obesity in mice? What prove do they have for this? If none, I suggest the phrase “animals fed on high fat diet is sufficient” 2. Experimental design- The statement “In this study, plant extract was chosen to study its effect during 4 weeks (short term), according to the previous studies by Lion <i>et al.</i> [16]” is confusing. Therefore, authors should state clearly when the when the treatment started, its duration and the total duration of the study. Results- Control group HDL-C [39.69- 48-60], the hyphen should be replaced with full stop	The phrase (mice were obese) changed to (animals fed on high fat diet) We changed the statement. We corrected the error
Minor REVISION comments	1. Delete Assessment from the title 2. Critical revision for grammatical errors is necessary, authors should indicate the grammatical changes they have made	We deleted the word “Assessment”
Optional/General comments	It's a good manuscript	Thank you
