SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Simple and honest research dealing with a hot topic. Minor revision. I advise Authors that they should manage variables as mean plus standard deviation not SEM being readers interested in knowing the dispersion of data not the precision of the mean. The following articles should be quoted to expand the references list. What about non-alcoholic fatty liver disease as a new criterion to define metabolic syndrome?	We have already made the mean and standard deviation statistics in our results.
Optional/General comments
