SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	In my opinion the work can be published after taking into consideration some corrects according to comments below: - abbreviations should be listed and full form of each abbreviation should be given in parentheses at first use in the text; - references are not written according to the General Guideline for Author and only half of the cited publications from the last decade; - Internationally accepted rules and the international system of units (SI) should be used; - improve the record <i>P</i> by Guideline for Reporting P values.	-In the instruction for authors there is no mention about the list the abbreviations. But as per your comments mentioned at the end of the article (Page no 8). -In the text, at the first use, full form of the abbreviation is mentioned. -References corrected and highlighted with yellow colour. - Sir within the available resource we have searched the articles, as per your observation, most of our references are from previous decade. -Used SI units only - The letter P is italicized and capitalized is per guidelines and it's also mentioned in guidelines that - "Correct expression: ($P = .05$). Wrong Expression: ($P < .05$), unless $P < .001$."
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
