SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	1 – It is better to include exclusion criteria since use of drugs like oestrogens, niacin, thyromimetics, aspirin, etc lower Lp (a) and statins may increase Lp (a) levels significantly. 2 – It is intriguing that both overt hypothyroid cases and controls having statistically no significant differences in respect to TC, HDL LDL, and VLDL and in BMI. The explanation provided in lines 213-215 does not well satisfy. 3 – References are to be arranged in full Vancouver style. Compare Ref. No. 3 with Ref. No. 4, 8,9,11,15,18,19 and Ref, No 6 with Ref. No. 7, 14for	Sir/Madam, I accept your suggestion and have included the same under 'Methodology' section of the article. I have quoted three articles in support of our findings with respect to similar picture seen in lipid profile of cases and controls. I have highlighted the same in the text. The mistakes have been rectified and I have
