

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_27911
Title of the Manuscript:	Association between TNF-α (-308 G$\leftrightarrow$A) polymorphism and Nephropathy (End Stage Renal Disease)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	Please see the comments and edits attached. Overall a good idea and the findings are interesting. I do think you should delve a little deeper into why your group is interested in looking at this specific abnormality. Have you published in this area previously? Also please include more data, many of the important points showed up in the discussion and not the results section.	• We are currently working on the cytokine gene polymorphism and nephropathy and this paper presents initial findings. • We have made the required changes in the manuscript. We have added ANOVA of parameters across genotypes. • All other data has been added in the form of histogram and tables. • The points showed in discussion have been demonstrated in results.
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
