SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	1. The language used throughout the manuscript is quite awkward. It is recommended that the content be vetted by a native English language speaker. 2. The introduction should focus on areas as relevant to the content of the manuscript. The first two paragraphs of the introduction can be replaced with the importance of using <i>in silico</i> and <i>in vivo</i> / <i>in vitro</i> methodologies for high-throughput information gain. 3. Figure 1 appears to have been extracted from already printed material. As such, it is very important to obtain appropriate permission before inclusion in the manuscript. Should it be impossible to gain permission, replacement of the figure or removal is strongly recommended. Same applies for figures 2 – 3 as well.	1. As per suggestion no. 1 author has proofread from the English language speaker 2. The small piece of information that tells about <i>in silico</i> and <i>in vitro</i> study is inserted in the first two paragraphs. 3. Authors declare that figures are not extracted from anywhere. All figures are drawn by Ms. Twinkle S. Bansode.
<u>Minor</u> REVISION comments	Please check the list of references. It appears that some of them don't follow the recommended format.	
<u>Optional/General</u> comments	None
