

SDI Review Form 1.6

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_23194
Title of the Manuscript:	Biochemical Changes And Fatigability In Albino Rats After Oral Administration Of Adenosine Triphosphate
Type of the Article	Original research Articles

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound.

SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The main contribution of the current study, in both scientific and clinical points of view, is connected with proof of some negative effects, on the influence of one of the key bio-molecules, included in the metabolic processes (as ATP), on the organism. For this goal, the authors are used albino rats, which are appropriate experimental model analogue of the humans, and, hence, it becomes clear enough what could be the final results of administration	
<u>Minor</u> REVISION comments	The current investigation gives a possibility for determination of optimal dose of ATP for the normal metabolism	
<u>Optional/General</u> comments
