SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	The authors did not explain why they study this issue in their study and what is the importance of this issue in the medicine? They wrote and cited number 1 literature in their introduction section but this literature is not related to their issue and also its publication year was 2009 not 2010. Also literature 2 is an only comment on another study. Authors must use and cite original article information in their manuscripts. In the methods section, They did not give any information about how they give the drugs? When and how did they take blood from the animals? Check the literature 5. Statistical Analysis is not sufficient for the data. They must use ANOVA, Kruskal-Wallis and Mann-Whitney U analysis in their study. The authors did not show and discuss their data in an appropriate manner. They were used wistar albino rats in their study. But they did not declare any ethical permission about the animals.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments	In the summary section the authors mentioned TC but they did not explain TC term in this section.
